SKILLS

- JavaScript / TypeScript
- React / Next.js
- Node.js
- REST APIs
- Firebase
- MongoDB
- Git & GitHub
- Docker

APPROACH

- Clean, modular architecture
- Performance-first builds
- Systems built to scale
- Accessibility-focused UI

AVAILABILITY

Open to freelance and full-time frontend / full-stack roles.

PROFILE

Performance-driven frontend and backend developer focused on building scalable websites that optimize workflows for real-world businesses. Technical emphasis on engineering responsive layouts, live asynchronous data synchronization, and state management systems using React and TypeScript.

EXPERIENCE

Frontend Developer — Holubuadey Auto

Freelance • August 2026

- Built a premium automobile sales and tracking web application using React, TypeScript, Vite and Tailwind.
- Implemented modular product displays and a fully responsive search layout for browsing vehicle listings.

Full-Stack Developer — Kriz Graphics & Publicity

Freelance • June 2026

- Delivered a business website for a print & design studio in Ibadan, including online booking and live order-status tracking.
- Built an admin dashboard and gallery management system on React, TypeScript and Firebase.

Frontend Developer — Mufti Laundry Spot

Freelance • March 2026

- Developed a responsive service website for a laundry business using HTML, CSS, JavaScript and Bootstrap.
- Implemented a working contact form with direct WhatsApp integration for customer inquiries.

WHAT CLIENTS SAY

“Mamoud built us a clean, responsive site with a contact form that actually works and a direct WhatsApp link — customers reach us faster now.”

— Omogbolahan — Mufti Laundry Spot

“From online booking to live order tracking and an admin dashboard, he understood exactly what our studio needed.”

— Olyjey — Kriz Graphics & Publicity

“The site looks premium and the search actually works well on mobile, which is where most of our customers browse from.”

— Abdulqudus — Holubuadey Auto
